WORK EXPERIENCE

IT Intern, NYK-FIL Maritime E-Training, Inc.

2024

- Part of a team that developed a supplier management system for the company.
- Assisted in teaching work immersion students about Arduino programming basics.

PROJECTS

Homelab Monitor (Personal)

- Designed and developed a personal web app using Blazor (MudBlazor) for the frontend, and ASP.NET Core Web API for the backend.
- Provides a real-time view of Proxmox host resources via its API.

Supplier Management System (Internship)

- Contributed to both frontend (Livewire) and backend development, including database management.

Online Enrollment System (College Thesis)

- Designed and developed a monolithic web application using ASP.NET Core Razor Pages and SQL Server.
- Managed the deployment using Azure App Services.
